

SolRenew

EXPERTS IN
CLEAN ENERGY.

COMPANY PROFILE |

Our Services:

Project Development

SolRenew has a team of trusted Business Partners with experience in designing energy projects, including: Solar PV, Battery Storage, and CHP Systems. Our services include:

- ▶ System design
- ▶ Vendor selection and negotiation
- ▶ Obtaining permits
- ▶ Project management
- ▶ Development of financial models
- ▶ Securing funding for project

Energy Products

We have a select group of vendors that provide high quality, proven equipment to meet the solar energy needs of our clients. Our product line includes:

- ▶ Znshine Solar PV
- ▶ Hoymiles Microinverters
- ▶ Blue Planet Energy Battery Storage

Energy Management

We can help you reduce your building's energy consumption, which allows a reduction in cost and carbon emissions. Our services include:

- ▶ Energy Efficiency Consulting
- ▶ Entouch – Building Management Software

We are committed to providing you
with clean energy!

About Us:

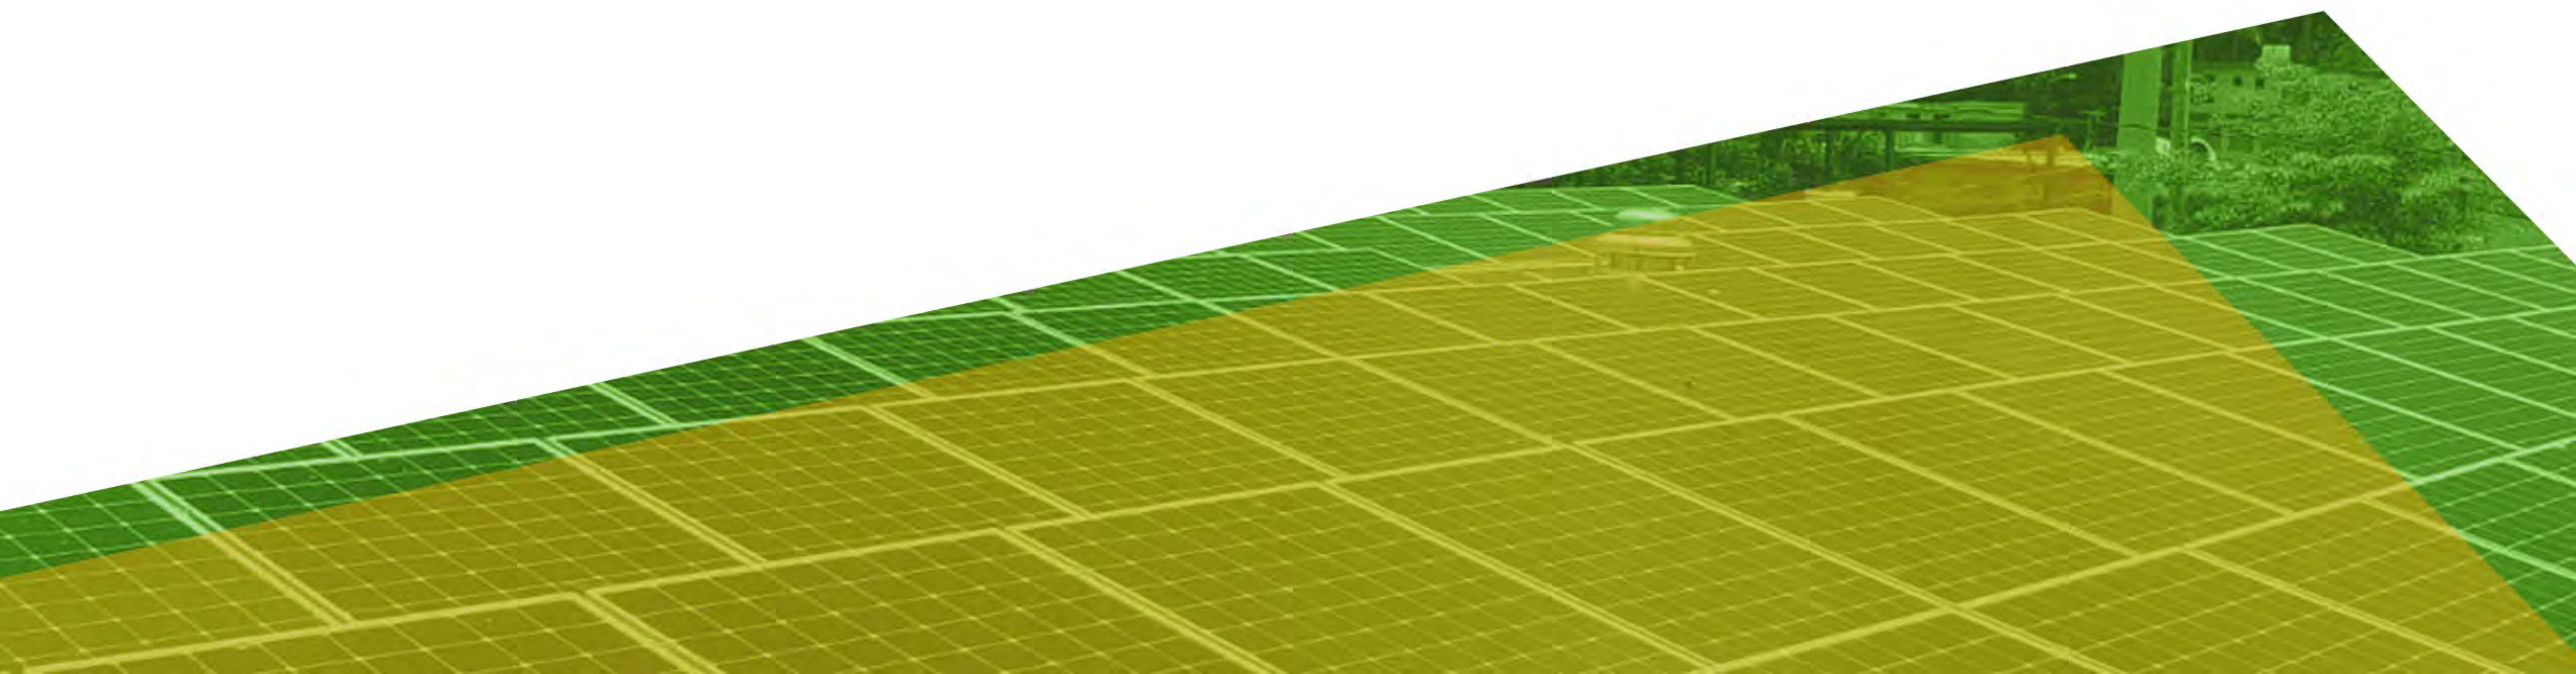

We assist customers in project development activities in solar PV projects ranging from commercial projects over 50Kw to Utility-Scale projects up to 50MW. Our team of professionals include design engineers, project managers, and an experienced finance team. Since its establishment, SolRenew has adhered to the principle of “integrity basis and service first” and made strict demand for itself. Currently, SolRenew has a team of experienced and trusted Business Partners with expertise in designing energy projects, including Solar PV, Battery Storage, and CHP systems. SolRenew and its team have a combined experience developing over 50 MW of solar energy projects in Puerto Rico over the past ten (10) years.

Our Mission

To provide renewable energy products and solutions that are of the highest quality and cost effectiveness. We will only work with the highest caliber and ethical professionals in the industry to ensure that our customers always receive world class products and solutions.

Our Vision

To be a leader in the development of next-generation renewable energy solutions that will lead Puerto Rico to a fossil-fuel free economy. We will accomplish this by partnering with the best in class suppliers and professionals.

PARTNERS

Blue Planet Energy provides support including project design and sales support, component compatibility testing and assurance, system-level component configuration and integration, installation support, and O&M services. They are the sole manufacturer of the Blue Ion battery systems—the safest, most powerful energy storage products that also provide the lowest lifetime cost of ownership.

Entouch offers software, IoT powered devices, and expert advisory services as a comprehensive solution for optimized smart building management. Its managed cloud-based platform lowers capital expense, reduces maintenance costs, and provides limitless scalability. ENTOUCH's 24/7 command center analyze your facility data, identify patterns, trends, and inconsistencies; and work to resolve HVAC, lighting, equipment, and 3rd party sensor issues.

In 2015, the Hoymiles microinverter was rated by the California Energy Commission (CED) as the world's most efficient microinverter with a rated efficiency of 96.7%. Microinverters are compact units that attach directly to each solar module in the array which is different than the traditional inverters that are attached directly to the solar array (grouping of multiple solar modules). By distributing the conversion process at the module level, it makes the entire solar power system more productive, reliable, and smarter than traditional inverter systems.

Gabriel Pérez

SolRenew CEO

Gabriel Pérez is a founding member of the renewable energy industry in Puerto Rico with over 12 years of experience. He has extensive business experience in various countries in Latin America, including Mexico, Panama, Costa Rica, Colombia, Chile, and Argentina, where he has been regional sales manager of various renewable energy manufacturers. In Puerto Rico, he served as Project Manager for a 16MW DC solar PV project in Salinas. Between 2014 and 2016, he executed over 30 commercial and industrial Power Purchase Agreement (PPA's) with an aggregate capacity in excess of 30MW. In this role, he managed the entire sales cycle from evaluating customer's energy needs, developing proposals, negotiating contracts, and negotiating interconnection agreements with PREPA.

SKILLS: PROJECT MANAGEMENT, CONTRACT NEGOTIATION, CONTRACTOR MANAGEMENT, COST ESTIMATION, AND GOVERNMENT PERMITTING.

CASE STUDIES:

COMMUNITY RESILIENCE FOR NATURAL DISASTERS

Partner: Blue Planet Energy

Location: 125 shelter schools in Puerto Rico

Objective: to address disaster mitigation during hurricanes.

Outcomes:

- ▶ Power autonomy and resilience for community.
- ▶ Immediate restoration of electricity during a disaster.
- ▶ Clean sustainable energy solution and no longer dependent on diesel generators.

COROZAL CLEAN WATER SYSTEM

Partner: Water Mission & Blue Planet Energy

Location: Corozal, Puerto Rico

Objective: to restore clean water with clean energy in a rural community in Corozal, Puerto Rico.

Outcomes:

- ▶ Immediate restoration of electricity and clean water during a disaster.
- ▶ Reliable off-grid storage installed with 20-year life cycle.
- ▶ Clean sustainable energy solution and no longer dependent on diesel generators.
- ▶ Blue Ion Battery System requires less maintenance and supervision as well as provides extended on-demand pumping services for the community.

SOLAR SCHOOLS IN PUERTO RICO

Partner: Blue Planet Energy

Location: 114 school sites around Puerto Rico

Objective: to build energy resilience and independence in Puerto Rico.

Outcomes:

- ▶ Energy resilience and independence.
- ▶ More than 100 schools equipped with battery systems charged with solar energy spread across over 50 municipalities.
- ▶ Clean sustainable energy solution.
- ▶ Blue Ion Battery System requires less maintenance and supervision as well as provides extended on-demand pumping services for the community.

CULEBRA CENTER FOR DIAGNOSIS AND TREATMENT

Partner: Blue Planet Energy and Pura Energía

Location: Culebra, Puerto Rico

Objective: to reestablish uninterrupted medical services in Culebra.

Outcomes:

- ▶ Clean sustainable energy solution and no longer dependent on diesel generators.
- ▶ A solar storage microgrid that provides critical backup power for CDT's entire emergency room and clinic.
- ▶ CDT will never have to worry about power outages or refueling finite gas for their generator again and will be able to fully focus on their medical services.

MARTÍN GARCÍA MIDDLE SCHOOL

Partner: Blue Planet Energy

Location: Toa Baja, Puerto Rico

Objective: to build energy resilience in the school and the community.

Outcomes:

- ▶ Reliable and Safe Emergency Power.
- ▶ Long-Term Energy Resilience and Savings.
- ▶ School transformed into a resilience hub for first responders.
- ▶ School is now saving \$1,800 a month on its electric bill. This provides additional funds for school supplies and activities.

Considering going solar? Let us help you find the best solution.
